No date	n. d.	Versus	vs., *v.*
No place	n. p.	Volume, volumes	v., vol.
Number, numbers	no., nos.	Year	yr.
Octavo	8°		

Common abbreviations for names of States and months are also used.
H. or S. followed by a number stands for House bill or Senate bill, respectively.
* Document for sale by Superintendent of Documents.
† Distribution by office issuing document, free if unaccompanied by a price.
‡ Document not obtainable.

Explanation

Words and figures inclosed in brackets [ ] are given for information, but do not appear on the title-pages of the publications catalogued. When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin. The dates, including day, month, and year, given with Senate and House documents and reports, are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays. When Congress and session are not given with the numbers of Senate and House documents and reports, 61st Congress, 2d session, is to be understood.

General Information

The Superintendent of Documents is authorized to sell at cost any public document in his charge, the distribution of which is not otherwise provided for.

Documents can not be supplied by this Office free to individuals, **nor can they be forwarded in advance of payment.**

Documents entered in this catalogue that are for sale by the **Superintendent of Documents, Washington, D. C.,** are indicated by a star (*) preceding the price named. A dagger (†) indicates that application should be made to the Department, Bureau, or Division issuing the document, a double dagger (‡) indicates that the document is not obtainable, and whenever additional information concerning the method of procuring a document seems necessary it will be found under the name of the Bureau. The Senate and House documents and reports are issued in limited editions, and unless otherwise indicated, may be obtained only through Members of Congress.

In ordering a publication from the Superintendent of Documents give the name of the issuing Department, Bureau, or Division, and title. If publication is numbered give number also. Do not order by Library of Congress card number.

Read carefully the instructions "How to remit," found at the bottom of the next page.

The accumulation of publications in this Office amounts to over a million, of which several hundred thousand are assorted, forming the sales stock. Many rare books are included, but under the law all must be sold "at cost," regardless of their age or scarcity.

In ordering, it should be borne in mind that many of the books have been in stock some time and are apt to be shop-worn. In filling orders, however, the best copy available is sent.

No general price-list of public documents is available, but lists on special subjects will be furnished on application.

MONTHLY CATALOGUE DISTRIBUTION

The Monthly catalogue is sent to each Senator, Representative, Delegate, and officer in Congress, to designated depositories and State and Territorial libraries, to substantially all Government authors, and to as many school, college, and public libraries as the limited edition will supply.

Subscription price to individuals, $1.10 a year, including indices. Back numbers can not be supplied. Please notify the Superintendent of Documents of any change in address.

LIBRARY OF CONGRESS CARDS

Numbers to be used in ordering the L. C. catalogue cards will be found at the end of the titles of the more important monographic documents. The figure following the card number (separated from it by a slanting line) indicates the number of cards required for entries suggested (title entry not included) on the cards. The price of the cards is 2c. for the first card and $\frac{7}{10}$c. for each additional card for the same title ordered at the same time. **Remittances should be made to the Librarian of Congress.** Cards can not be furnished by the Superintendent of Documents.

CUMULATIVE INDEX

Beginning with July, 1910, the Index to the Monthly catalogue will be issued separately each quarter and will cumulate for the twelve months ending June, 1911. That is, the September number of the Index is an index to the Monthly catalogue for July, August, and September, the December number will be an index to the Monthly catalogue for October to December, the March number will be an index to the Monthly catalogue for January to March, and the June number will be the Index for the fiscal year 1911. Persons desiring to bind the catalogue at the end of the year should be careful to retain the numbers received monthly, as duplicate numbers can not be supplied.

HOW TO REMIT

Remittances for the documents marked with a star (*) should be made to the **Superintendent of Documents, Washington, D. C.,** by postal money order, express order, or New York draft. Currency may be sent at sender's risk.

Postage stamps, foreign money, uncertified checks, defaced or smooth coins will positively not be accepted.

To facilitate the payment of the cost of documents, the Superintendent of Documents will hereafter accept coupons issued by him instead of cash. Coupons of the value of 5 cents each are sold in sets of 20 for $1.00. Address order to Superintendent of Documents, Government Printing Office.

No charge is made for postage on documents forwarded to points in United States, Guam, Hawaii, Philippine Islands, Porto Rico, or to Canada, Cuba, or Mexico. To other countries the regular rate of postage is charged, and remittances must cover such postage.

Notes of General Interest

The Report on farmers' institutes in the United States, 1909, has been reprinted (in a 5-cent pamphlet) from the Annual report of the Office of Experiment Stations. It is an encouraging report. Returns have been received from 49 States and Territories, and in 47 of them institutes had been held. More marked progress was made than in any previous year. More money was appropriated, more sessions were held, and the attendance was greater than at any other time since this means of carrying scientific agriculture to the very door of the actual farmer was devised.

Progress report of investigations in human nutrition in the United States, 1905–09, is another very useful 5-cent separate from the Annual report of the Office of Experiment Stations. It briefly reviews the literature of the five years relating to human nutrition, and probably no previous five years turned out so much on this vital subject. One may not be able to learn from these brief reviews all that one should know of these matters, but the way to learn more is clearly pointed out by numerous references to the books and magazines in which extended treatises on various phases of the subject are to be found.

Statistics of land-grant colleges and agricultural experiment stations, fiscal year 1909, is another interesting 5-cent separate from the same prolific depository of agricultural lore. It gives the name of the president, the date of establishment, the location, the courses of study, the revenues, and numerous other details for the land-grant colleges, while for the State agricultural experiment stations it gives the location, date of establishment, principal lines of work, number and size of publications, and so forth and so on.

There is a new Superintendent at the Government Reservation, Hot Springs, Ark., and his first annual report indicates that he is the proverbial new broom. He says that for 40 years systems which he calls "hotel drumming" and "doctor drumming" had been pursued at the Springs till they had become established industries—and nuisances. Though Hot Springs is a town of only 16,000 permanent residents, it has 600 hotels and boarding-houses and the arrivals of visitors by rail for the first four months of the present year exceeded 53,000. As these were mostly invalids or fast livers seeking health or recuperation through the curative waters of the springs, the field for "hotel drumming" and "doctor drumming" was large and inviting. The report says, however, that the hotel

drumming was mostly a subterfuge in aid of the doctor drumming, the chief end being to get invalids into the hands of unregistered doctors. The new Superintendent seems to have tackled the drumming business energetically and successfully, sending agents aboard the trains to warn visitors against the drummers, shoals of whom had formerly invaded the trains as far away as St. Louis and Memphis. The drummers were thus driven off and the Government agents informed the arriving invalids that if they employed unregistered doctors they would not be permitted to bathe in the healing waters of the Government springs. So far from these stringent measures keeping intending visitors away, the number during the past year was greater than ever before. The Superintendent believes that remarkable cures have been effected by the use of the waters at Hot Springs.

Government annual reports are not all humdrum details and statistics. Here, for instance, is a very serious question raised by the Commissioner of Fisheries in his 1910 report:

"In some of the hatcheries of the Bureau [of Fisheries] and in similar establishments under State and private auspices certain fish diseases have become so prevalent as to make it a matter of grave consideration whether the propagation of certain species, especially the trouts, should not be abandoned. It frequently occurs that the fish and fry are decimated by epidemics for which there are no known remedies. The gravest phase of the matter is the possible relationship of some of these diseases to more or less kindred affections occurring in human beings. It has been determined that a type of cancerous affection is of widespread distribution among domesticated trout and their offspring planted in the streams. Whether this disease has a causal relation to cancer in human beings, or whether the two are to be even traced to the same source, is a matter of doubt, but the annually increasing mortality from cancer in man and certain remarkable coincidences in the geographical distribution of the disease in man and fish render it imperative that it should be made the subject of minute inquiry."

There is a new print of Rules of practice in the Patent Office dated Oct. 1, 1910.

Experiment Stations Office Circular 99 is another one of those excellent publications looking to the diffusion of scientific education in agriculture of which so many have been issued by the same office. Its title is Farmers' institutes for young people.

A leaflet has been issued by the General Land Office dated Oct. 11, 1910, under the title Soldiers' and sailors' homestead rights.

A study of melting-point determinations, with special reference to the melting-point requirements of the United States Pharmacopœia, is the title of Hygienic Laboratory Bulletin 70. This title may not convey a very definite idea to the lay reader, but melting-points are among the most important tests in identifying drugs and determining their purity, and as by sec. 7, Food and drugs act, approved June 30, 1906, the Pharmacopœia is made the standard by which adulterations are to be determined, Bulletin 70 seems justified in its comment "that the food and drugs act confers upon the

Pharmacopœia, in its field of operation, the exalted dignity of a Federal statute—makes it the law of the land in the vitally important matter of official drug standards—and imposes upon that body of men which constitutes the United States Pharmacopœial Convention the very great responsibility of producing a Pharmacopœia which shall, in every sense, uphold the dignity of the law and be worthy to represent the final authority on the standardization of drugs." The ninth decennial revision of the Pharmacopœia is now pending, and the Public Health and Marine-Hospital Service, more especially through its Hygienic Laboratory, is contributing actively and earnestly to this important and highly technical work. To this end Bulletin 70 submits a series of recommendations as to methods of determining melting-points for incorporation in the new edition of the Pharmacopœia. The price of Bulletin 70 is 15 cents. This and other publications of the Public Health and Marine-Hospital Service are sold by the Superintendent of Documents.

Water-supply paper 255, Underground waters for farm use, is of so practical a character and appeals to so wide a public that it is likely to be in active demand. It sells at 15 cents.

The Census Bureau's special report on telephones is out of press. Cloth, 55 cents.

Another excellent separate from the 1909 Annual report of the Office of Experiment Stations, entitled Reclamation of the southern Louisiana wet prairie lands, has been issued and sells at 10 cents. The Report itself, from which so many useful separate pamphlets have been reprinted, is priced at 40 cents in paper covers and 55 cents in cloth binding.

Plant Industry Bureau Bulletin 193, Experiments in blueberry culture, brings the promise of a valuable addition to the stock of cultivated small fruits. The blueberry is not a huckleberry. There are several differences, perhaps the most noticeable being the fact that the seeds of the blueberry are so small that they are unnoticeable in eating the berries. It is found that the blueberry will not grow in fertilized or limed soils, but only in acid peaty soils in which other fruit plants will not grow at all. It therefore offers a means of profitably utilizing millions of acres of soil now unutilized. It bears transportation well, and at its best is a fine fruit, the choicest of the wild berries, which are the only ones now known, going almost exclusively to the Boston market and commanding there a high price. With the prospect of improvement of its size and quality by cultivation, it is a matter worth the while of fruit growers to look into. Bulletin 193 is a very complete exposition of the subject, reporting the researches of several years. It is profusely illustrated, and sold by the Superintendent of Documents at 25 cents.

The 16th index for binding Farmers' bulletins has been issued. It provides title page, table of contents, and index for binding the 25 numbers, 376 to 400. Similar "apparatus" for binding each

25 numbers has been issued, from the beginning of the series more than 20 years ago, and the farmer, stockgrower, fruitgrower, or poultryman who has the complete set bound and indexed in 16 vols. has a library which will come to his aid in almost any emergency.

Vol. 37, Proceedings of the National Museum, has been published.

Animal Industry Bureau Bulletin 126, The bacteriology of commercially pasteurized and raw market milk, is a timely contribution to the large and growing mass of literature on the milk question.

One of the most voluminous and important of the publications of the National Monetary Commission, Laws of the United States concerning money, banking, and loans, 1778–1909, was published as Senate document 580, 61st Congress, 2d session, with a very brief and inadequate table of contents, though with a full index. A full table of contents (22 pages) has now been published as Senate document 580, part 2.

Bulletin 81, Statistics Bureau, Agriculture Department, Grain movement in the Great Lakes region, is the result of special collection of data and its facts are not shown in any other Government publication (so avers the introductory page).

The Division of Militia Affairs, War Department, has issued for 1910 a report of 284 pages, with map. Since the militia became a national as well as a State ward, the interest in this important branch of the national defense has shown a decided increase.

Bulletin 45, Ethnology Bureau, has the title Chippewa music, Frances Densmore being the author. Director Holmes states that Miss Densmore has been for several years engaged in the study of Indian music, phonograph records being one of the means employed. The present work, of 216 pages, is illustrated by 12 plates, 8 text figures, and numerous scores and "song pictures."

Entomology Bureau Bulletin 80, Papers on deciduous fruit insects and insecticides, has been in course of publication in parts. Part 6, Life history of the codling moth in northwestern Pennsylvania; Part 7, The one-spray method in the control of the codling moth and the plum curculio; and Part 8, Tests of sprays against the European fruit lecanium and the European pear scale, have now been received. These complete Bulletin 80, which will soon be issued as one publication, with index.

The petition of the United States of America, filed in the Circuit Court of the United States for the Southern District of New York in the suit for the dissolution of the American Sugar Refining Company, popularly known as the Sugar Trust, is a volume of 221 pages, the most of them decidedly interesting reading.

Labor Bureau Bulletin 89, the one last issued, has for leading article a very comprehensive paper of 413 pages on child-labor legislation in Europe.

NOTE.—The documents briefly described in the two notes next following were entered under their appropriate headings in the Monthly catalogue for October, but without the prices, which at that time were not obtainable.

Chemistry Bureau Bulletin 134, Maple-sap sirup, its manufacture, composition, and the effect of environment thereon, should be a welcome document to all northernborn Americans, for to their palates the most delectable of all sweets is that derived from the spring-flowing sap of the hard-maple tree. This bulletin draws a broad line between sap-sirup and sugar-sirup, saying that sirup made by melting maple sugar is not the real thing. Only in sirup made from the sap, and made under the best conditions and with the utmost care and skill, are the exquisite qualities of the maple sweet preserved. How to do this and the reasons for doing it are shown in this bulletin, and it would be well worth the while of all maple-sirup farmers to study it, for there is hardly any limit to the price they may get for their product when it is really of the best possible quality. The price of Chemistry Bureau Bulletin 134 is 25 cents. It is profusely illustrated.

Contributions from the national herbarium, vol. 15, is out of press. Its title is The North American species of Panicum. It describes 197 species and 8 subspecies. Price 40 cents.

WOMAN AND CHILD WAGE-EARNERS

The Labor Bureau has in course of publication a very extensive report on this subject, resulting from an investigation ordered by Congress, Jan. 29, 1907, in an act providing for an investigation of "the industrial, social, moral, educational, and physical condition of woman and child workers in the United States, wherever employed, with special reference to their age, hours of labor, term of employment, health, illiteracy, sanitary and other conditions surrounding their occupation, and the means employed for the protection of their health, person, and morals." The bill as passed did not carry an appropriation, but each of the two succeeding sundry civil bills appropriated $150,000, thus enabling the Bureau to send into the field a large force of special agents to gather the data necessary to fill the very large order given by Congress.

For nearly a year past almost the whole local force of the Bureau has been engaged in preparing the data thus gathered for publication.

The report will be published as Senate document 645, 61st Congress, 2d session, in 19 parts or volumes, under the general title Condition of woman and child wage-earners in the United States. No provision thus far has been made for a departmental or bureau edition without the Congressional document number. The manuscript for the first nine volumes has already been sent to the Public Printer. These volumes will bear the following subtitles: Volume 1, Cotton textile industry; 2, Clothing industry; 3, Glass industry;

4, Silk industry; 5, Wage-earning women in stores and factories; 6, Some phases of the beginnings of child labor legislation in certain States; 7, Conditions under which children leave school to go to work; 8, Juvenile delinquency and its relation to employment; 9, History of women in industry in the United States.

The remaining ten volumes will be sent to the Public Printer within the next few weeks. Their numerical order has not been finally determined, but they will consider these subjects: Hardships attending child-labor laws; Relation of occupation and criminality of women; Women as machine operators in the metal trades; Women in laundries; History of women in trade unions; Causes of death among woman and child cotton mill operatives; Employment of women and infant mortality; Hookworm disease among cotton mill operatives; Employment of women and children in selected industries; Employment of women and children in agriculture.

With but few exceptions, these volumes are based on original data collected solely for this investigation and therefore not available in other form. It is by far the most extensive investigation ever made of this most interesting and important subject. The volumes are sure to furnish the occasion for much discussion and agitation, and quite probably for further legislation.

THE MOST VALUABLE MINERAL

"The man in the street" is likely to scoff when he first hears water spoken of as "the most abundant and most valuable mineral in nature," but this is the class and the rank assigned to it by the United States Geological Survey, and the Survey is consequently giving to it all the attention that can be given with appropriations which it considers quite inadequate to the tremendous magnitude of the work.

What has been accomplished, however, seems fairly wonderful when one who has not kept pace with the progress of the work comes to consider it in its present stage.

The first and greatest thing to know about water is what supply of it can be had at any particular place. To this end the Survey has hundreds of stations all over the country occupied in measuring rivers and smaller streams, gaging their flow and computing the averages, so that there are few streams of much importance on which the Survey can not give data. Whether a stream is wanted for public or for private use, the average volume of its supply and its extent at high and low water must be known before any kind of permanent construction for its use as a mechanical power can safely be entered upon. This information, and much more, the Survey has published and is publishing for the benefit of those interested. In its series of Water supply papers 260 numbers have been thus far published and many more have been announced as in press or in preparation.

It is the present purpose to call attention only to one of the subseries of the Water supply papers, recently published under the general title Surface water supply of the United States, 1907–08. Under this title parts 1–12 have been published, the numbers, titles, and prices being shown in the following list.

Part 1. North Atlantic Coast (Water-supply paper 241). Paper, 35c.
Part 2. South Atlantic Coast and eastern Gulf of Mexico (Water-supply paper 242). Paper, 20c.
Part 3. Ohio River basin (Water-supply paper 243). Paper, 20c.
Part 4. St. Lawrence River basin (Water-supply paper 244). Paper, 20c.
Part 5. Upper Mississippi River and Hudson Bay basins (Water-supply paper 245). Paper, 15c.
Part 6. Missouri River basin (Water-supply paper 246). Paper, 30c.
Part 7. Lower Mississippi basin (Water-supply paper 247). Paper, 15c.
Part 8. Western Gulf of Mexico (Water-supply paper 248). Paper, 20c.
Part 9. Colorado River basin (Water-supply paper 249). Paper, 25c.
Part 10. Great Basin (Water-supply paper 250). Paper, 15c.
Part 11. California (Water-supply paper 251). Paper, 30c.
Part 12. North Pacific Coast (Water-supply paper 252). Paper, 35c.

All of these are substantial volumes, the smallest one containing 124 pages and the largest 418 pages. Each volume has illustrative plates. The 12 parts cover the work of 1907 and 1908 throughout the whole country, and are the latest issues of this branch of the work in water. All of these and other series published by the United States Geological Survey are sold by the Superintendent of Documents.

FIREWOOD

The Forest Service has made its first attempt at the task—obviously a difficult one—of estimating the quantity and value of the firewood annually consumed in the United States. It has had in this work the assistance of more than 48,000 crop correspondents of the Statistics Bureau, Agriculture Department, and of census special agents in cities of over 30,000 population, while for cities and towns of from 1,000 to 30,000 inquiries were sent to firms in the fuel trade. The results are published in Forest Service Circular 181 (5c.). The conclusions reached must prove rather surprising, especially to city dwellers, with whom the use of coal and gas has become so common that it is hard for them to think of firewood as more than a negligible quantity. It is, on the contrary, the second largest class of wood products annually consumed, being exceeded only by the double class known as lumber and shingles. The total annual consumption of wood is over 20 billion cubic feet, of which firewood takes over 7 billion. Stated in cords of 128 cubic feet each,

the firewood accounts for 86,000,000 cords a year, valued at $250,000,000. These are large figures, helping to make one realize more vividly the largeness of the country. When the first Congress to appropriate a billion dollars arrived—several years ago—the reply to the charge of extravagance was "This is a billion-dollar country." It was the correct answer, and its correctness daily becomes more evident. It is hardly possible nowadays to take up any kind of statistics relating to national production or consumption without speedily running into millions or hundreds of millions or even billions.

A SUPERB PATRIOTIC PUBLICATION

Glenn Brown's History of the United States Capitol (the building, not the city) carries on its title page this quotation from Rufus Choate, a famous orator and Senator of two generations ago: "We have built no temple but the Capitol; we consult no common oracle but the Constitution."

When Mr. Choate uttered these words he of course could have had no thought of supplying a fitting inscription for the most sumptuous and elaborate historical monograph ever issued from the Government press, but their fitness for such use is obvious and it was a happy thought of the author of the History of the Capitol to thus use them.

Mr. Brown's History is in two volumes, vol. 1 recording all known information concerning the Old Capitol, of which President Washington laid the corner-stone in 1792 and which remained still old and inadequate till 1851, when work began on the dome and wings which changed it to the present imposing structure. Vol. 2 records minutely the history of the New Capitol, 1851–1900.

As the author is a practising architect and a Fellow of the American Institute of Architects, it was to be supposed that his history would be especially strong on the architectural side, and so it is. Nowhere else can so complete and accurate an account be found of the competitions, dissensions, dangers, and final happy outcome of the efforts, in the infant days of the republic, to secure a worthy design for a Capitol building. The same is true as to the history of the more ambitious plans for the extension on which construction began in 1851. The proposed plans for further extension also receive attention—for the Capitol is not considered to be yet complete.

Mr. Brown was engaged for many years in collecting material for his great history. The Capitol building during the various stages of its existence has been under the jurisdiction of many different Departments, commissions, committees, and superintendents, and its historical records were therefore to be looked for in many official places. Some of them were in unofficial places also, due to the fact that various architects and superintendents had made private property of public records and so left them to their

descendants. All of these sources were thoroughly explored by the author, and everywhere he found courtesy and assistance, being thus enabled to bring to unexampled completeness the history of the most famous and important public building in America.

In illustration the volumes are, if possible, even more complete than in text. The plates are not only very numerous (322 in all) but they are also interesting in subject and excellent in execution. They include external views of the Capitol in all periods of its growth—and there wasn't much of it when it was first occupied. They include also reproductions of many unsuccessful plans submitted in competition when Capitol plans were first invited. Some of those which happily failed of acceptance are really grotesque. Many of the statues and paintings and much of the mural decoration is also reproduced. The Capitol history thus makes its appeal to collectors on several grounds, of which patriotism is perhaps not the least compelling.

A number of sets of this superb work remain in the hands of the Superintendent of Documents for sale at a price which is probably hardly more than one fifth the sum a private publishing house would necessarily charge for so beautiful and costly a set. The Government price is $20.00 for the two very large folio volumes, 15½ inches high by 11¾ inches wide, securely and beautifully bound in red and gold.

COUES'S BIBLIOGRAPHY

When a librarian is asked for Parts 1–4 of Dr. Elliott Coues's American ornithological bibliography he or she is likely to be at least momentarily puzzled. Part 2, or the "2d instalment," as Dr. Coues called it, is found in Hayden's Survey as Bulletin 2, article 17, in vol. 5 of the bound edition of the Bulletin. The 3d instalment is found in the same volume as Bulletin 4. The 1st instalment, or Part 1, does not appear on the surface, though its whereabouts is pointed out in the introductions to the 2d and 3d instalments. It was printed as Bibliographical appendix, pages 567–784, in Coues's Birds of the Colorado Valley, which is vol. 11 of the Miscellaneous publications of Hayden's Survey. Evidently when Dr. Coues compiled the Bibliographical appendix he had no thought of going further with the work. If such a thought had been then in his mind he would undoubtedly have supplied the missing link connecting the Bibliographical appendix with the 2d, 3d, and 4th instalments. The 4th instalment skipped out of the Hayden Survey altogether and landed in the National Museum. It is found in vol. 2 of the Proceedings, pages 359–499. In this instalment the word "American" is dropped from the title and the references are all to publications relating to British birds. In the introductory paragraph Dr. Coues says that the Bibliographical appendix in Miscellaneous publication 11 "is to be considered as the first

the firewood accounts for 86,000,000 cords a year, valued at $250,000,000. These are large figures, helping to make one realize more vividly the largeness of the country. When the first Congress to appropriate a billion dollars arrived—several years ago—the reply to the charge of extravagance was "This is a billion-dollar country." It was the correct answer, and its correctness daily becomes more evident. It is hardly possible nowadays to take up any kind of statistics relating to national production or consumption without speedily running into millions or hundreds of millions or even billions.

A SUPERB PATRIOTIC PUBLICATION

Glenn Brown's History of the United States Capitol (the building, not the city) carries on its title page this quotation from Rufus Choate, a famous orator and Senator of two generations ago: "We have built no temple but the Capitol; we consult no common oracle but the Constitution."

When Mr. Choate uttered these words he of course could have had no thought of supplying a fitting inscription for the most sumptuous and elaborate historical monograph ever issued from the Government press, but their fitness for such use is obvious and it was a happy thought of the author of the History of the Capitol to thus use them.

Mr. Brown's History is in two volumes, vol. 1 recording all known information concerning the Old Capitol, of which President Washington laid the corner-stone in 1792 and which remained still old and inadequate till 1851, when work began on the dome and wings which changed it to the present imposing structure. Vol. 2 records minutely the history of the New Capitol, 1851–1900.

As the author is a practising architect and a Fellow of the American Institute of Architects, it was to be supposed that his history would be especially strong on the architectural side, and so it is. Nowhere else can so complete and accurate an account be found of the competitions, dissensions, dangers, and final happy outcome of the efforts, in the infant days of the republic, to secure a worthy design for a Capitol building. The same is true as to the history of the more ambitious plans for the extension on which construction began in 1851. The proposed plans for further extension also receive attention—for the Capitol is not considered to be yet complete.

Mr. Brown was engaged for many years in collecting material for his great history. The Capitol building during the various stages of its existence has been under the jurisdiction of many different Departments, commissions, committees, and superintendents, and its historical records were therefore to be looked for in many official places. Some of them were in unofficial places also, due to the fact that various architects and superintendents had made private property of public records and so left them to their

descendants. All of these sources were thoroughly explored by the author, and everywhere he found courtesy and assistance, being thus enabled to bring to unexampled completeness the history of the most famous and important public building in America.

In illustration the volumes are, if possible, even more complete than in text. The plates are not only very numerous (322 in all) but they are also interesting in subject and excellent in execution. They include external views of the Capitol in all periods of its growth—and there wasn't much of it when it was first occupied. They include also reproductions of many unsuccessful plans submitted in competition when Capitol plans were first invited. Some of those which happily failed of acceptance are really grotesque. Many of the statues and paintings and much of the mural decoration is also reproduced. The Capitol history thus makes its appeal to collectors on several grounds, of which patriotism is perhaps not the least compelling.

A number of sets of this superb work remain in the hands of the Superintendent of Documents for sale at a price which is probably hardly more than one fifth the sum a private publishing house would necessarily charge for so beautiful and costly a set. The Government price is $20.00 for the two very large folio volumes, 15½ inches high by 11¾ inches wide, securely and beautifully bound in red and gold.

COUES'S BIBLIOGRAPHY

When a librarian is asked for Parts 1–4 of Dr. Elliott Coues's American ornithological bibliography he or she is likely to be at least momentarily puzzled. Part 2, or the "2d instalment," as Dr. Coues called it, is found in Hayden's Survey as Bulletin 2, article 17, in vol. 5 of the bound edition of the Bulletin. The 3d instalment is found in the same volume as Bulletin 4. The 1st instalment, or Part 1, does not appear on the surface, though its whereabouts is pointed out in the introductions to the 2d and 3d instalments. It was printed as Bibliographical appendix, pages 567–784, in Coues's Birds of the Colorado Valley, which is vol. 11 of the Miscellaneous publications of Hayden's Survey. Evidently when Dr. Coues compiled the Bibliographical appendix he had no thought of going further with the work. If such a thought had been then in his mind he would undoubtedly have supplied the missing link connecting the Bibliographical appendix with the 2d, 3d, and 4th instalments. The 4th instalment skipped out of the Hayden Survey altogether and landed in the National Museum. It is found in vol. 2 of the Proceedings, pages 359–499. In this instalment the word "American" is dropped from the title and the references are all to publications relating to British birds. In the introductory paragraph Dr. Coues says that the Bibliographical appendix in Miscellaneous publication 11 "is to be considered as the first

instalment of a Universal bibliography of ornithology." He says also that the first three instalments "represent a nearly complete bibliography of American ornithology"; and, finally, that "this instalment, like those which have preceded it, is to be considered only in the light of published proof-sheets, to be canceled on the final appearance of the whole work."

Dr. Coues died in 1899, leaving this work incomplete.

Hayden's Miscellaneous publications no. 11, which is Coues's Birds of the Colorado Valley, has on its title page the words Part first, Passeres to Laniidæ. This can hardly have been intended to apply to the Bibliographical appendix, although, as it turned out, three additional instalments of the Appendix were published, while no other part of the Birds of the Colorado Valley has been forthcoming.

The proper title of Hayden's Survey is Geological and Geographical Survey of the Territories, though from some of its title pages the words "and Geographical" are omitted. The period of its activities was 1867–1878, but the publication of its reports was not completed till 1890. It was an active publisher, its catalogue showing 12 Annual reports, 13 Final volumes or monographs, 27 Bulletins, 12 Miscellaneous volumes, and 17 Unclassified publications, besides numerous maps. The number of separate scientific papers included in the Annual reports, Bulletins, and Miscellaneous publications runs into the hundreds. Among the authors are many who were then or have since become eminent in their several branches of scientific research.

A PUZZLE IN THE ANNALS

The Annals of Congress is the series in 42 volumes which records, so far as was possible at the date of publication, the proceedings of the first 17 Congresses and the 1st session of the 18th. A note in the October, 1908, Monthly catalogue concerning the Annals did not supply all the details needed to give librarians and others interested a full understanding of the set.

Two volumes were compiled by Joseph Gales, senior, and published by Gales and Seaton with the imprint date 1834. The title pages are: The debates and proceedings in the Congress of the United States [etc.] comprising the period from March 3, 1789, to March 3, 1791, inclusive. On the back the lettering is Debates in Congress, old series. Vol. 1, 1789–90. Vol. 2, 1790–91.

It seems most improbable that the words "old series" were used in the back title when the books were a new series first issued. These words must have been an afterthought, but when they were first supplied does not appear. Apparently all copies now extant have them. No indications have been found that any more volumes than the first two, covering the period of the 1st Congress, were published for several years after 1834. In 1849 the same publishers

proceeded with the issue of additional volumes, including the reprinting of volumes 1 and 2. In this reprint the former title pages were reproduced in full, including the imprint date 1834, but a half-title was prefixed, as follows: Annals of the Congress of the United States; First Congress. The back titles also were changed to read Annals of Congress, 1st Congress, 1st and 2d sess., Vol. 1, 1789–90.

Though specific data are wanting, it is a moral certainty that the Annals of Congress volumes 1 and 2, though bearing the imprint date 1834, were not then printed, though it is equally certain that the volumes 1 and 2 labeled on the back Debates in Congress were printed in that year.

March 4, 1849, Congress directed the Secretary of the Senate and the Clerk of the House to subscribe, in behalf of Congress, for 1,000 copies of the Debates and Proceedings of Congress, "from the termination of the first Congress, where the present publication stops, until the end of the fourth Congress, the same having been compiled and ready for the press." This was the beginning, which led to the publication of 40 additional volumes. Sept. 30, 1850, Congress directed the Secretary and the Clerk to make a new subscription for 2,000 sets (of which the 1,000 already subscribed for should be a part) and to begin at the first session of Congress, thus including the two volumes published in 1834 and making necessary the reprint of those two volumes which has proved a puzzle because of the fact that the two prints, though having the same volume numbers, title pages, and imprint dates, do not "match up," so that the library which has volume 1 of one print and vol. 2 of the other finds an accountable discrepancy between the two. [See Statutes at large, vol. 9, pages 419, 524, 543, 599.]

Really the contents of the two volumes taken together are identical, though the number of columns in the two prints differ.

The Annals is one of the old-fashioned sets which has each of its pages divided into two columns, each column instead of each page being numbered. Vol. 1 of the first print, back-titled Debates in Congress, old series, contains 1322 columns, while the same volume in the second or Annals of Congress print contains only 1170 columns. Vol. 2 of the first print begins at column 1323, connecting with Vol. 1 of the same print. Vol. 2 of the second print begins at column 1171, connecting with Vol. 1 of the same print. As both prints are still extant, they sometimes get mismated in libraries, as the Superintendent of Documents has reason to know because of inquiries received. If the librarian has Vol. 1 in the Annals of Congress print and Vol. 2 in the Debates in Congress print, he is very likely to think that he has lost 153 columns somewhere between the two volumes, while if his Vol. 1 is of the first or Debates in Congress print and his Vol. 2 of the second or Annals of Congress print there appears to be a duplication of 151 columns.

As librarians identify books by their title pages and not by the binders' titles on the backs, and as the title pages of the first and second prints are identical even to the imprint dates, these mix-ups are the more likely to occur.

It is difficult to account for the anomalous and misleading act of Gales and Seaton in retaining the imprint date 1834 on the reprint of Vols. 1 and 2 made in the 50's. The Gales of the firm was the son of Joseph Gales, senior, by whom Vols. 1 and 2 had been compiled, and the Seaton of the firm was his son-in-law. Mr. Gales, senior, died in 1841. It is conceivable that the firm so intimately related to him felt some scruples as to changing the title pages which he had affixed to his chief work.

No trace has been found in the Statutes of an appropriation, either directly or in the old-time fashion of an authorized subscription by the Secretary of the Senate or the Clerk of the House, in aid of the publication of Vols. 1 and 2, Debates in Congress, published in 1834.

LIGHT-HOUSE DISTRICTS

The new Bureau of Light-Houses, which recently superseded the Light-House Board, has announced a rearrangement of the light-house districts. The Third subdistrict becomes the Ninth district; the Ninth district becomes the Twelfth; the Fifteenth district becomes the Thirteenth; the Sixteenth becomes the Fifteenth; Alaska, formerly a part of the Thirteenth district, is made a district by itself and numbered the Sixteenth; the remainder of the Thirteenth district becomes the Seventeenth; the Twelfth district becomes the Eighteenth; the Hawaiian and other American Pacific Islands, formerly the Twelfth subdistrict, becomes the Nineteenth district. The First, Second, Third, Fourth, Fifth, Sixth, Seventh, Eighth, Tenth, Eleventh, and Fourteenth districts remain unchanged in boundaries and numbers.

RAILROAD SECURITIES COMMISSION

Sec. 16 of the act to create a Commerce Court, etc., usually called the Commerce act (Statutes, 61st Congress, 2d session, Chap. 309), authorizes the President to appoint a Commission "to investigate questions pertaining to the issuance of stocks and bonds by railroad corporations," etc. The President has appointed as the members of this Commission President Arthur T. Hadley of Yale University, who is Chairman, Frederick N. Judson of St. Louis, Frederick Strauss of New York, Walter L. Fisher of Chicago, and Professor B. H. Meyer of Madison, Wis. The Commission has been assigned quarters in the Senate office building, has appointed Mr. W. E. S. Griswold as its secretary, has assumed the title Railroad Securities Commission, and has actively taken up its work. [See Session laws, 61st Congress, 2d session, part 1, page 556.]

TESTING OF STRUCTURAL MATERIALS

The testing of structural materials "both belonging to and for the use of the United States," formerly conducted by the Geological Survey, has been transferred to the Bureau of Standards, the equipment for the work being also transferred. The Standards Bureau has now, in addition to its main laboratories in Washington, a laboratory at Atlantic City for the study of the effects of sea water and sea air on structural materials; another at Northampton, Pa., for the testing of cement for the Isthmian Canal Commission, and a third at Pittsburg for testing a variety of materials. These facilities of the Bureau are available to all Departments of the Government.

There was a popular impression, derived, no doubt, from the terms of Public act 179, approved May 16, 1910, that the testing of structural materials was to be transferred from the Geological Survey to the new Bureau of Mines. The direction of the transfer was, however, changed by an amendment to the Sundry civil act, approved June 25, 1910.

AN UNPUBLISHED BULLETIN

Several months ago, when Leaflet 40, Structural materials, was published by the Superintendent of Documents, the Geological Survey had "in preparation" an unnumbered bulletin to be entitled Investigations of concrete and reinforced concrete at ten technological institutions, and an announcement to this effect was included in the leaflet.

The bulletin thus announced has not been published and a statement concerning it seems to be required because of inquiries from correspondents. It is learned that in the turnover of the structural materials work from the Geological Survey to the Standards Bureau this unnumbered and unpublished bulletin was included. The Standards Bureau has not yet made an announcement as to its publication.

AN ERROR CORRECTED

An error has been discovered in the index and one of the side notes of the Session laws, 61st Congress, 2d session, part 1. It refers to Chap. 373, An Act relating to liens on vessels for repairs, supplies, or other necessaries. Section 5 of this act provides that the Act "shall supersede the provisions of all State statutes conferring liens on vessels," etc., but by an unaccountable slip the side note and the index entry both say "State laws *not* superseded." The plates have now been corrected, and in copies of the Session laws hereafter printed and in the Statutes at large, vol. 36, the word "not" will not appear in this connection. [Session laws, 61st Congress, 2d session, pages 605 and LXXVI.]

CORRECTIONS FOR MONTHLY CATALOGUES

December, 1909. For "[v. 1 was issued in 1888 with title, Regulations for uniform of Army of United States.]" in 3d and 4th lines of last entry under Quartermaster's Department on page 282, read "[v. 1 was issued in 1890 with title, Uniform of Army of United States, 1774–1889.]"

NOTE.—Owing to recent information it has been found that the publication noted as v. 1 in the December catalogue is not volume 1 of this set.

October, 1910. For "Warner of Wisconsin" in 5th line of 5th paragraph on page 140, read "Warner of Missouri".

MONTHLY CATALOGUE

No. 191 NOVEMBER 1910

AGRICULTURE DEPARTMENT

NOTE.—Those publications of the Department of Agriculture which are for sale will be supplied by the Superintendent of Documents, Washington, D. C. The Department issues a monthly list of publications, which is mailed to all applicants, enabling them to select such reports and bulletins as interest them.

[Bureau of Animal Industry] order 172, 173; Nov. 17, 1910. [1910.] Each 1 p. [Consist of order concerning quarantine of cattle, etc.] †

Food inspection decisions 127, 128. Oct. 31, Nov. 15, 1910. † Agr 7—1659/2

Mission of cooperative demonstration work in the South; [by S. A. Knapp]. Nov. 1, 1910. 8 p. (Circular 33.) † Paper; * paper, 5c. Agr 10—1707/2

Notice of judgment 499, 501, 625–648, food and drugs act. Aug. 30–Nov. 12, 1910. † Agr 8—878/4

Yearbook, [calendar year] 1909. 1910. 652 p. il. 36 pl. (H. doc. 129.) [For contents see entry of this publication without Congressional document number in Monthly catalogue for April, 1910, page 575.] * Cloth, $1.00. Agr 7—1035/2

ANIMAL INDUSTRY BUREAU

Bacteriology of commercially pasteurized and raw market milk [with bibliography]; by S. Henry Ayers and William T. Johnson, jr. Nov. 14, 1910. 98 p. il. (Bulletin 126.) * Paper, 15c. Agr 10—1708/4

Etiology of hog cholera; by M. Dorset, B. M. Bolton, and C. N. McBryde. 1905 [reprint 1910]. ix+102 p. 6 pl. (Bulletin 72.) [Plates 4–6 are added to this reprint.] * Paper, 25c. Agr 9—1213/4

Service announcements 41; Sept. 15, 1910. [1910.] p. 57–64. [Monthly.] ‡ Agr 7—1658/2

State live-stock sanitary officers. Nov. 5, 1910. 4 p. (Circular 164.) † Paper; * paper, 5c. Agr 10—1709/2

State sanitary requirements governing admission of live stock. Nov. 9, 1910. 20 p. narrow 16' * Paper, 5c. Agr 10—1746/2

BIOLOGICAL SURVEY BUREAU

California ground squirrel; by C. Hart Merriam. Nov. 25, 1910. 15 p. il. (Circular 76.) † Paper; * paper, 5c. Agr 10—1747/3

CHEMISTRY BUREAU

Comparison of beef and yeast extracts of known origin; by F. C. Cook. Nov. 15, 1910. 7 p. (Circular 62.) † Paper; * paper, 5c. Agr 10—1732/3

Officials charged with enforcement of food laws in United States and Canada; revised to July 1, 1910. Nov. 3, 1910. 39 p. (Circular 16 revised.) † Paper; * paper, 5c. Agr 9—2739/3

ENTOMOLOGY BUREAU

Insect injuries to wood of living trees; by A. D. Hopkins. Nov. 16, 1910. 4 p. (Circular 126.) [Revised extracts from Bulletin 58, pt. 5.] † Paper; * paper, 5c. Agr 10—1737/2

Insects in their relation to reduction of future supplies of timber and general principles of control; by A. D. Hopkins. Nov. 25, 1910. ii+10 p. (Circular 129.) [Revised extracts from Bulletin 58, pt. 5.] † Paper; * paper, 5c. Agr 10—1748/2

Insects which kill forest trees, character and extent of their depredations and methods of control; by A. D. Hopkins. Nov. 25, 1910. ii+9 p. (Circular 125.) [Revised extracts from Bulletin 58, pt. 5.] † Paper; * paper, 5c. Agr 10—1749/2

Papers on deciduous fruit insects and insecticides: Life history of codling moth in northwestern Pennsylvania; by A. G. Hammar. Nov. 28, 1910. iv+71-111 p. il. 1 pl. (Bulletin 80, pt. 6.) * Paper, 10c. Agr 10—1792/2

Same: One-spray method in control of coddling moth and plum curculio; by A. L Quaintance, E. L. Jenne, E. W. Scott, and R. W. Braucher. Nov. 28, 1910. iii+113-146 p. il. 2 pl. (Bulletin 80, pt. 7.) * Paper, 5c. Agr 10—1793/6

Same: Tests of sprays against European fruit lecanium and European pear scale; by P. R. Jones. Nov. 28, 1910. iv+147-160 p. 2 pl. (Bulletin 80, pt. 8.) * Paper, 10c. Agr 10—1794/3

Some insects injurious to forests: 1, Locust borer [with bibliography], by A. D. Hopkins; 2, Western pine-destroying bark-beetle [with bibliography], by J. L. Webb; 3, Additional data on locust borer, by A. D. Hopkins; 4, Southern pine sawyer [with bibliography], by J. L. Webb; 5, Insect depredations in North American forests and practical methods of prevention and control [with bibliography], by A. D. Hopkins. 1910. vii +114 p. il. 3 pl. (Bulletin 58.) * Paper, 20c. Agr 10—1733/2

Some miscellaneous results of work of bureau, 9: Pecan cigar case-bearer [with bibliography]; by H. M. Russell. Nov. 12, 1910. iii+79-86 p. il. 3 pl. (Bulletin 64, pt. 10.) * Paper, 5c. Agr 10—1736/2

EXPERIMENT STATIONS OFFICE

Agricultural experiment stations. List of station publications received by office during Oct. 1910. Nov. 15, 1910. 3 p. ([Publication] 1327.) [Monthly.] † Agr 9—1395/2

—— Statistics of land-grant colleges and agricultural experiment stations, 1909; by M. T. Spethmann. 1910. ii+211-250 p. ([Publication] 1310.) [From Report, 1909.] † Paper; * paper, 5c. Agr 6—371/5

—— Work and expenditures of agricultural experiment stations, year ended June 30, 1909; by E. W. Allen. 1910. iv+55-209 p. 8 pl. ([Publication] 1309.) [From Report, 1909.] † Paper; * paper, 15c.

Agriculture Department. Free publications of Department classified for use of teachers; by Dick J. Crosby and F. W. Howe. Nov. 8, 1910. 35 p. (Circular 94 [revised].) † Paper; * paper, 5c. Agr 10—433/3

Experiment station record, v. 23, no. 6; Nov. 1910. 1910. cover-title, ix+501-600 p. * Paper, $1.00 a vol. (6 nos., 2 abstracts, and an index). Agr 9—832/4

NOTE.—Mainly made up of abstracts of reports and publications on agricultural science which have recently appeared in all countries, especially the United States. Extra numbers, called abstract numbers, are issued quarterly, which are made up almost exclusively of abstracts, that is, they contain no editorial notes and only a limited number of current notes.

Experiment station work 60; Sept. 1910. Nov. 19, 1910. 24 p. il. (Agriculture Dept. Farmers' bulletin 425.) † Paper; * paper, 5c. Agr 6—305/3

Farmers' institutes. Farmers' institutes for young people; by John Hamilton and J. M. Stedman. Nov. 12, 1910. 40 p. (Circular 99.) † Paper; * paper, 5c. Agr 10—1738/3

Same, district 5, upper Mississippi Valley, report for Sept. 1910; George M. Chappel, district editor. Washington, Weather Bureau [1910]. 14 p. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 6, Missouri Valley, report for Sept. 1910; Montrose W. Hayes, district editor. Washington, Weather Bureau [1910]. 18 p. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 7, lower Mississippi Valley, report for Sept. 1910; Isaac M. Cline, district editor. Washington, Weather Bureau [1910]. 16 p. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 8, Texas and Rio Grande Valley, report for Sept. 1910; Bernard Bunnemeyer, district editor. Washington, Weather Bureau [1910]. 11 p. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 9, Colorado Valley, report for Sept. 1910; Frederick H. Brandenburg, district editor. Washington, Weather Bureau [1910]. 10 p. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 10, Great Basin, report for Sept. 1910; Alfred H. Thiessen, district editor. Washington, Weather Bureau [1910]. 8 p. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 11, California, report for Sept. 1910; Alexander G. McAdie, district editor. Washington, Weather Bureau [1910]. 14 p. il. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Same, district 12, Columbia Valley, report for Sept. 1910; Edward A. Beals, district editor. Washington, Weather Bureau [1910]. 21 p. il. 2 p. of maps, 4° [From Monthly weather review, Sept. 1910.]

Meteorological chart of Great Lakes, Jan. 1911. [1910.] 17.9×26.1 in. [Monthly.] † Price on application. Agr 8—76/2

NOTE.—This is the first issue of the second series of the Meteorological chart of the Great Lakes issued by the Weather Bureau. The first series, issued in chart form, covered the years 1897–1900; from 1901–1907 the publication appeared in 4° pamphlet form. No. 1, 1907, was the last issue of the first series.

Meteorological chart of Indian Ocean, Jan. 1911. [1910.] 17.7×25.9 in. [Monthly. 1st issue.] † Price on application.

Meteorological chart of north Atlantic Ocean, Jan. 1911. [1910.] 17.8×26 in. [Monthly.] † 5c.

NOTE.—Contains, on reverse, Tracks of storms in Jan. 1903–10, over north Atlantic Ocean; Ocean currents, their relation to one another, by W. J. Humphreys.

Meteorological chart of north Pacific Ocean, Jan. 1911. [1910.] 17.7×26 in. [Monthly.] † 5c.

NOTE.—Contains, on reverse, Ocean currents, their relation to one another, by W. J. Humphreys.

Monthly weather review, v. 38, no. 9; Sept. 1910. Washington, Weather Bureau [1910]. cover-title, p. 1309–1467, il. map, 32 p. of pl. and maps, 4° * Paper, 35c. single copy, $4.00 a yr. Agr 9—990/4

NOTE.—This publication is confined to climatological data and the relations between climatology and practical problems in engineering, hygienics, or agriculture.

National monthly weather bulletin, Oct. 1910; no. 30 [1910]. Nov. 5, 1910. 24×19 in. [Weekly, Apr.–Sept., monthly remainder of year.] * Paper, 25c. a yr. Agr 9—1305/2

Weather map [containing forecasts for Northeastern, middle Eastern, and Southeastern States], Nov. 1–30, 1910. [1910.] 19×24 in. [Daily except Sundays and holidays.] * Editions issued at Washington, D. C., 25c. a month, $2.50 a yr.; editions issued at about 50 stations throughout United States, 20c. a month, $2.00 a yr.

Same [containing forecasts for United States], Nov. 1–30, 1910. [1910.] 19×24 in. [Daily. The Sunday edition does not contain as much information as the edition for week days.]

AMERICAN REPUBLICS BUREAU

NOTE.—Name changed to Pan American Union which see on page 227.

CIVIL SERVICE COMMISSION

NOTE.—The Commission furnishes its publications gratuitously to those who apply for them.

[Announcements and postponements of examinations] Dec. 7, 1910–Jan. 6, 1911. Oct. 29–Nov. 26, 1910. 4° †

Information concerning political assessments and partisan activity of officeholders. July, 1910 [reprint Nov. 1910]. 7 p. †

Instructions to applicants, 7th civil-service district, headquarters, Chicago, Ill. Oct. 1910. 28 p. †

Same, 10th civil-service district, headquarters, New Orleans, La. Oct. 1910. 26 p. †

Instructions to boards of examiners, Engineer Department at Large. Oct. 1910. 7 p. †

COMMERCE AND LABOR DEPARTMENT

NOTE.—The Department of Commerce and Labor distributes the Consular reports gratuitously.

APPOINTMENT DIVISION

Annual report, fiscal year 1910. 1910. 39 p. †

CENSUS BUREAU

Explanatory list of diagrams relating to deaths of infants prepared for annual meeting and exhibit of American Association for Study and Prevention of Infant Mortality, Baltimore, Nov. 9–11, 1910. 1910. 15 p. † 10—36100

Telephones, [calendar year] 1907. 1910. 129 p. il. 7 pl. 4° (Special reports.) * Cloth, 55c. 10—36109

COAST AND GEODETIC SURVEY

NOTE.—The monthly Notice to mariners, formerly issued by the Coast and Geodetic Survey, has been consolidated with and made a part of the Notice to mariners issued by the Bureau of Light-Houses, thus making it a joint publication. The charts, coast pilots, and tide tables of the Coast and Geodetic Survey are sold at the office of the Survey in Washington, and also by one or more sales agents in each of the important American seaports.

Tables for polyconic projection of maps based upon Clarke's reference spheroid of 1866. 3d edition. 1910. 189 p. il. 4° (Special publication 5.) * Paper, 25c. 10—36106

Charts

California, Pfeiffer Point to Point Cypress; chart 5476. Scale 1:40,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1895. 41.5×25.8 in. † 50c.

Cape Cod Bay, Mass.; chart 110. Scale 1:80,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1872. 30.1×38.4 in. † 50c.

Cebu Harbor and approaches, east coast of Cebu, P. I., scale 1:30,000; with inset, Cebu Anchorage, scale 1:10,000; chart 4447. Washington, Coast and Geodetic Survey, Nov. 1910, first published 1902. 28.1×34.8 and 18.8×18.2 in. † 30c.

Frenchman's and Blue Hill bays and approaches, Mount Desert Island, Me.; chart 103. Scale 1:80,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1883. 37.5×29.1 in. † 50c.

Georgia, from Savannah to Sapelo Island; chart 156. Scale 1:80,000. Washington, Coast and Geodetic Survey, Nov. 1910, first published 1876. 41.1×32.1 in. † 50c.

Grays Harbor, Wash., original surveys between 1860 and 1910, hydrography and corrections to shoreline from U. S. engineers to 1910; with inset, Continuation of Chehalis River; chart 6195. Scale 1:40,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1886. 21.6×38.2 in. † 25c.

Kahului Harbor and approaches, Hawaiian Islands; chart 4105. Scale 1:10,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1901. 29.1×26.1 in. † 25c.

Long Island Sound, North shore of, Fairfield to Georges Rock, Conn.; chart 266. Scale 1:10,000. Washington, Coast and Geodetic Survey, Nov. 1910, first published 1895. 37×34.9 in. † 50c.

Same, Rye Neck to New Rochelle, N. Y.; chart 271. Scale 1:10,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1894. 42.4×33.6 in. † 50c.

Luzon and Masbate, P. I., Passages between, and Sorsogon Bay, topography of eastern part of Sorsogon Bay surveyed in 1902, Port Barrera from survey by Bureau of Mines in 1904, remainder of chart from Spanish surveys to 1896; chart 4219. Scale 1:100,000. Washington, Coast and Geodetic Survey, Nov. 1910. 39.5×31.6 in. † 40c.

Philippine Islands, from United States and foreign sources; chart 4200. Mercator projection. Washington, Coast and Geodetic Survey, Oct. 1910. 49.5×32.9 in. † 50c.

Port Galera and Varadero Bay, Mindoro, north coast, P. I., triangulation, hydrography and topography executed in 1902, 1903, and 1908; chart 4344. Scale 1:10,000. Washington, Coast and Geodetic Survey, Nov. 1910. 29.3×35.1 in. † 30c.

[South Carolina and Georgia] from Hunting Island to Ossabaw Island, including Port Royal Sound and Savannah River; chart 155. Scale 1:80,000. Washington, Coast and Geodetic Survey, Nov. 1910, first published 1873. 32.4×40.1 in. † 50c.

Washington, Seacoast and interior waters of, from Grays Harbor to Semiamoo Bay; chart 6400. Scale 1:300,000. Washington, Coast and Geodetic Survey, Oct. 1910, first published 1886. 38.8 ×32.6 in. † 50c.

FISHERIES BUREAU

Influence of eyes, ears, and other allied sense organs on movements of dogfish, Mustelus canis, Mitchill [with bibliography; by G. H. Parker]. Nov. 18, 1910. [1]+43–57 p. (Bureau of Fisheries doc. 738.) [From Bulletin, v. 29.] † F 10–1

Report of commissioner, fiscal year 1910. 1910. 40 p. (Bureau of Fisheries doc. 734.) † F 10–2

Statement of quantities and values of certain fishery products landed at Boston and Gloucester, Mass., by American fishing vessels, Sept. 1910. [1910.] 1 p. oblong large 8° (Statistical bulletin 246.) †

LABOR BUREAU

Bulletin 89; July, 1910. 1910. iv+450 p. [Bimonthly.] * Paper, 25c. 4—18114/5

GEOLOGICAL SURVEY

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers; and maps, Monographs, and folios of the Geologic atlas (issued in Library and Field editions) and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to $11.00 each. A wholesale rate has been established for topographic and geologic folios (either Library or Field editions), whenever the sum transmitted solely for folios at the wholesale price amounts to at least $5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington. For topographic sheets see page 214.

Maps

United States, scale 1:2,500,000; with inset, Alaska, scale 150 m.=0.9 in. [Washington] Geological Survey, 1910, first published 1890. 3 sheets, each about 48.2×25.7 in., size of inset, 8×13.7 in. † 60c.

Topographic sheets

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are ordinarily used, 1 : 62,500, 1 : 125,000, and 1 : 250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch, covering, respectively, average areas of 230, 920, and 3,700 square miles. For some areas of particular importance special large-scale maps are published. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

More than one-third of the area of the country, excluding outlying possessions, has been mapped, every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least $3.00.

California, Knights Landing quadrangle, lat. 38° 45′–38° 52′ 30″, long. 121° 37′ 30″–121° 45′. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1910. 17.3×13.5 in. † 5c.

California, Marcuse quadrangle, lat. 38° 52′ 30″ –39°, long. 121° 37′ 30″–121° 45′. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1910. 17.3×13.5 in. † 5c.

California, Nicolaus quadrangle, lat. 38° 52′ 30″–39°, long. 121° 30′–121° 37′ 30″. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1910. 17.3×13.5 in. † 5c.

California, Sheridan quadrangle, lat. 38° 52′ 30″–39°, long. 121° 22′ 30″–121° 30′. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1910. 17.3×13.5 in. † 5c.

Illinois, Carlyle quadrangle, lat. 38° 30′–38° 45′, long. 89° 15′–89° 30′. Scale 1 : 62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Sept. 1910. 17.5×13.7 in. † 5c.

Illinois, Okawville quadrangle, lat. 38° 15′–38° 30′, long. 89° 30′–89° 45′. Scale 1 : 62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Oct. 1910. 17.5×13.8 in. † 5c.

Kansas-Missouri, Leavenworth quadrangle, lat. 39° 15′–39° 30′, long. 94° 45′–95°. Scale 1 : 62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Aug. 1910. 17.5×13.7 in. † 5c.

Mississippi, Coahoma quadrangle, lat. 34° 15′–34° 22′ 30″, long. 90° 30′–90° 37′ 30″. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of July, 1910. 17.3×14.4 in. † 5c.

Mississippi, Jonestown quadrangle, lat. 34° 15′–34° 22′ 30″, long. 90° 22′ 30″–90° 30′. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Aug. 1910. 17.3×14.4 in. † 5c.

Mississippi, Walnut Lake quadrangle, lat. 34° 30′–34° 37′ 30″, long. 90° 15′–90° 22′ 30″. Scale 1 : 31,680, contour interval 5 ft. [Washington, Geological Survey] edition of Sept. 1910. 17.3×14.3 in. † 5c.

West Virginia, Fayetteville quadrangle, lat. 38°–38° 15′, long. 81°–81° 15′. Scale 1 : 62,500, contour interval 50 ft. [Washington, Geological Survey] edition of Sept. 1910. 17.5×13.9 in. † 5c.

Report of traveling auditor and bank examiner of New Mexico on territorial finances, fiscal year May 31, 1910, and on county finances, territorial institutions, banks, and building and loan associations, fiscal year 1910. 1910. 21 p. †

PATENT OFFICE

NOTE.—The Patent Office publishes Specifications and drawings of patents, both in single copies and monthly volumes. The single copies are not enumerated in this catalogue, but may be obtained for 5c. each at the Patent Office. Beginning with Jan. 1, 1910, the Superintendent of Documents will sell the monthly volumes at $5.00 per volume or $60 per year, and back numbers, prior to 1907, may be had at $3.00 per volume or $36 per year.

A variety of indexes, giving a complete view of the work of the Patent Office from 1790 to date, are published at prices ranging from 25c. to $10 per volume and may be obtained from the Superintendent of Documents. The Rules of practice and pamphlet Patent laws are furnished free of charge upon application to the Patent Office. The Patent Office issues coupon orders in packages of 20 at $1.00 per package, or in books containing 100 coupons at $5.00 per book. One coupon will procure a specification with drawing. These coupons are good until used, but are only to be used for orders sent to the Patent Office. For schedule of office fees, address Chief Clerk, Patent Office.

PAN AMERICAN UNION

NOTE.—In accordance with a resolution passed and signed by the Fourth International Conference of American Republics, which assembled July, 1910, at Buenos Aires, Argentina, and adjourned Aug. 27, 1910, the name of the International Bureau of the American Republics was changed to the Pan American Union and the title of the Director and Secretary to Director General and Assistant Director. These new terms will hereafter appear in all publications of this Office.

This Office sells its own monthly bulletins, handbooks, etc., at prices usually ranging from 5c. to $1.00. The price of either the English or the foreign section of the bulletin is 25c. single copy or $2.00 a year; that of both of the sections (double number) is 40c. single copy or $3.00 a year. Address the Director General of the Pan American Union.

Scheme of Kentucky, Chicago, Ill., standpoint. Dec. 1910. 207 p. [Half of the pages are blank.] ‡

TOPOGRAPHER

NOTE.—Since February, 1908, the Topographer has been preparing rural-delivery maps of counties in which rural-delivery is completely established. They are published in two forms, one giving rural free delivery routes starting from a single given post-office, the other the rural free delivery routes of an entire county. A uniform scale of 1 inch to 1 mile is used. The maps are drawings on tracing linen, and copies are reproduced by the sun-print process. Editions are not issued, but sun-print copies may be obtained at 50c. a copy for the county maps, and 10c. a copy for the maps giving routes starting from a single post-office, from the Disbursing Clerk, Post-Office Department. These maps should not be confused with the post route maps for which see Monthly catalogue for January, 1910, page 351.

SMITHSONIAN INSTITUTION

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are: 1, Contributions to knowledge; 2, Miscellaneous collections; 3, Annual reports; 4, Special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The *volumes* of Contributions and of Miscellaneous collections are distributed only to public libraries and to learned institutions and societies in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are regularly distributed by the Institution to libraries throughout the world, and only a limited number of the volumes remains to supply demands from other sources. No general mailing-list of individuals is maintained. The reports can be had by purchase from the Superintendent of Documents, Washington, D. C. The papers printed in the annual reports are published separately for *free* distribution. Publications should be ordered by the *serial number*. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

NATIONAL MUSEUM

NOTE.—The publications of the National Museum comprise bulletins, annual reports, and an annual volume of Proceedings. The annual report is included in the Congressional set. The editions of the bulletins and Proceedings are too limited to admit of general distribution, and the volumes of the latter are sent only to libraries.

Proceedings. 1910. v. 37, xii+697 p. il. 39 pl. [Articles 1695–1724 are included in this volume. Each article is also published separately in advance.] * Cloth, $1.00.

CONTENTS.—Mouse deer of Rhio-Linga Archipelago, study of specific differentiation under uniform environment; by Gerrit S. Miller, jr.—Carboniferous air-breathing vertebrates of National Museum; by Roy L. Moodie.—Five new species of recent unstalked crinoids; by Austin Hobart Clark.—New rhynchocephalian reptile from Jurassic of Wyoming, with notes on fauna of quarry 9; by Charles W. Gilmore.—On nature of Edestus and related genera, with descriptions of 1 new genus and 3 new species; by Oliver P. Hay.—Report on barnacles of Peru, collected by R. E. Coker and others; by Henry A. Pilsbry.—Isopods collected in northwest Pacific by Bureau of Fisheries steamer Albatross in 1906 [with list of references]; by Harriet Richardson.—Fresh-water sponges collected in Philippines by Albatross expedition; by Nelson Annandale.—Polychætous annelids dredged in 1908 by Owen Bryant off coasts of Labrador, Newfoundland, and Nova Scotia; by J. NORTHERN AND NORTHWESTERN LAKES SURVEY

NOTE.—Lake survey charts may be obtained from U. S. Lake Survey Office, Detroit, Mich., or from U. S. Engineer Office, Buffalo, N. Y. Payments must be made before charts are sent, and if made by mail must be by postal or express money order payable to the order of U. S. Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

Supplement 7, 1910, corrections and additions to Bulletin 19; to supplement information given upon charts of Great Lakes. U. S. Lake Survey Office, Detroit, Mich. [Nov. 22] 1910. p. 1–5+1.6–15+[2] p. map, 4° † 8—35459/3
